

## ***2015 NEW PRODUCTS***

### **BINOCULARS**

---

#### **Legend® E Series**

How do you make a legend better? Simple: Make one for everyone. For 2015, Bushnell® is adding three new series to its award-winning Legend line of binoculars. The E Series reaches new levels of excellence and value with the all-weather assurance of Bushnell's exclusive RainGuard® HD coating. Built with a lightweight magnesium chassis and fully multi-coated optics for amazing light transmission, the E Series demonstrates excellence in the field or on the water. Available in 8x or 10x magnification with powerful light-gathering 42mm objective lenses, E Series binoculars also feature improved high-resistance twist-up eyecups and fine-click adjustments built into the diopter. Custom objective covers protect and complete a package that brings legendary excellence into reach for a whole new segment of outdoor enthusiast.

#### **Features & Benefits**

- Lightweight magnesium chassis for reliability in extreme environments
- RainGuard HD water-repellent coating allows continued use in wet weather
- Ultra Wide Band Coating is customized for every lens to allow maximum brightness and truer color across the light spectrum
- PC-3® phase-coated prisms enhance resolution and contrast
- Lead-free environmentally-responsible glass
