

Bushnell®

AR OPTICS DROP ZONE .300 BLACKOUT RETICLE

PRESS RELEASE DATE:

NRA 2017

MARKET RELEASE DATE:

May 2017

For shooters running an AR chambered in .300 Blackout: Bushnell® now offers the optic to match. The Bushnell® AR Optics™ 1-4x24mm illuminated scope is equipped with a specially-designed illuminated Drop Zone .300 Blackout reticle. The reticle features holdover points calibrated to both subsonic and supersonic .300 Blackout ammunition. The scope's first focal plane design performs like a red dot at low power. When turned up to 4x magnification, the scope offers holdover points out to 300 yards. Magnification changes happen instantly with Bushnell's exclusive ThrowDown PCL™ (power change lever), and the fully multi-coated optics offer industry-best light transmission.

FEATURES & BENEFITS

- » Illuminated Drop Zone .300 Blackout reticle
- » 11 illumination settings
- » 30mm tube diameter
- » First focal plane
- » Throw Down PCL™ power change lever
- » Fully multi-coated optics
